

# RESPONSIBLY MANUFACTURED SANITIZERS

This unprecedented global COVID-19 pandemic has brought many challenges, including meeting the huge and much-needed demand for products to assist with cleaning and sanitizing. We are proud to be part of the effort in meeting these needs with the launch of new sanitizing products to complement our existing line of cleaning products.

According to the Center for Disease Control and Prevention (CDC) it is recommended to use an alcohol-based hand sanitizer that is at least 60 percent alcohol. Liquid Performance Hand Sanitizer is 80% alcohol and has been manufactured following the most current and stringent FDA guidelines<sup>1</sup>.

We are an EPA-registered facility (Reg. No. 96554-VA-1) and continue to manufacture all of our products to the highest industry standards that meet or exceed quality levels our customers and government agencies require. Liquid Performance continues to implement policies and procedures that ensure the protection of its employees, while identifying a solid strategy for successful business continuity. Liquid Performance is also taking on a number of measures related to COVID-19 to help support first responders and the community at large.

FDA Certified 3 ply surgical and KN95 masks.

FDA Certification paperwork available upon request.
